

LNC BARREL TESTING

ISSUES: [Brief cover]

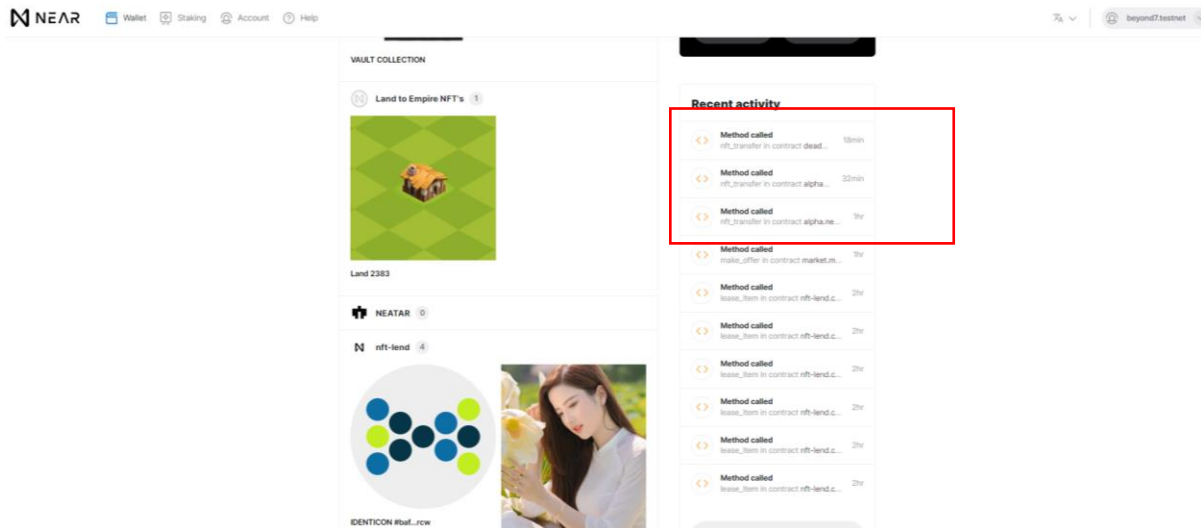

S. No	Test Case	Status	Comments
1.	Once we list our NFT on lend platform, we could not list other NFTs again	ISSUE	Multiple Listing should be available
2.	Could not able to list the NFT in lend platform (tried many times) , Only nft transfer calling method is done and “list item” is not done	ISSUE	Don’t know the actual reason. It is serious ISSUE. NEED TO FIX
3.	We can enter many Hours when renting up to 15 digits. After 15 digits also accepted by that hour box but when we click the “lease now” button, it stuck there	SMALL ISSUE	<u>Suggestion:</u> may be give pop up dialog box to guide not to enter more than these hours or something
4.	When listing the NFT, the hour box also accepts negative value E.g., -1.5 NEAR/Hour	ISSUE	<u>Suggestion:</u> It should not proceed to transaction of NEAR contract when value is negative
5.	When One NFT is lent, notification is not coming in the telegram (or) no notification page present in the NFT lend platform.	SMALL ISSUE	<u>Suggestion:</u> May be give feature like set notification page in top right corner in account icon and place these types of notifications there.
6.	In the Mintbase.io, when changing the wallet option to Ethereum, it goes to eth.mintbase.io and there, icon presented for near account switch but it is not redirecting	OUT OF THE BOX (SMALL ISSUE)	<u>Suggestion:</u> Need to set proper address link for NEAR account redirection

INTRODUCTION:

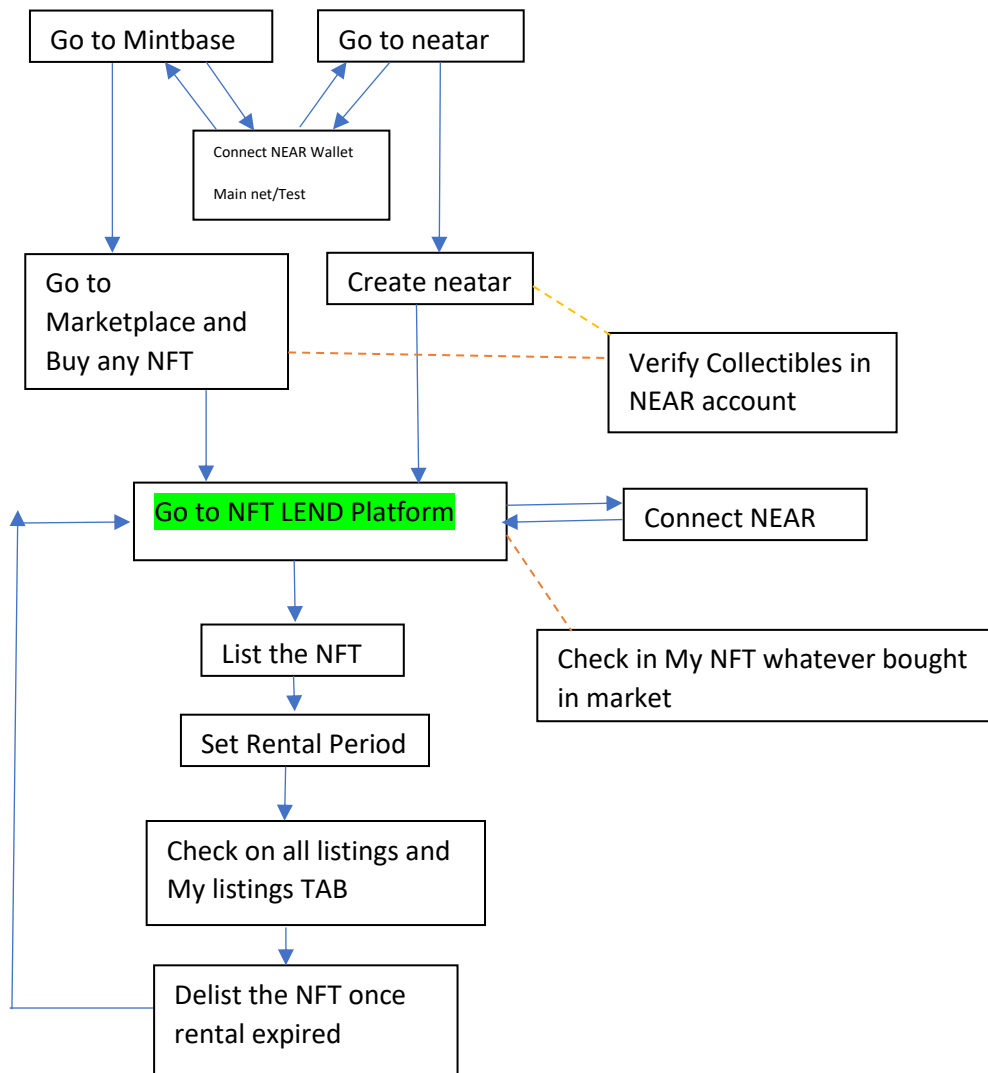

It is good one to lend our NFT for sometime to others to gain the values and we can earn some tokens. It’s same as real world business. **Considering the same one, Why we don’t have the many listings and lending the NFTs?**

This is the FIRST Issue. After my first lent NFT , I could not list the other NFTs on the LIST. Transactions done up to “nft transfer” and not done “ list item” transactions.

LNC BARREL TESTING

WORKING:

- We should list multiple NFT at a same time. (In my testing, After one NFT list, could not list the other.)

LNC BARREL TESTING

- Rental Expiry should be mentioned clearly in the appropriate NFTs. Not like labelled as just “Expiry date”. Expecting name “Rent Expiry”
- Notification page should be there to see the status of the account NFTs

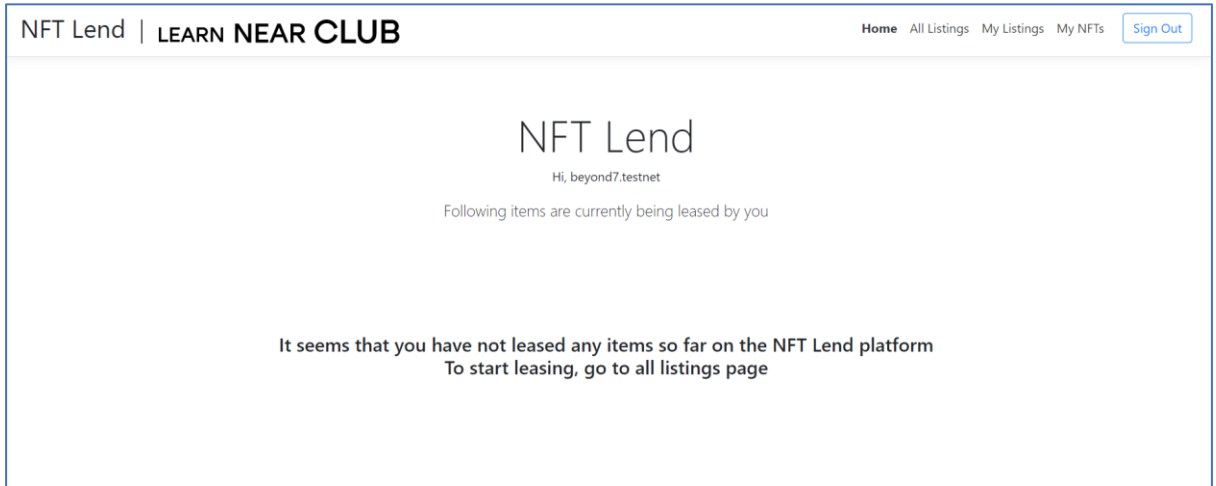

TESTINGS covered in TABLE:

S. No	Test Case	Status	Comments
1.	NFT Lend platform connect	OK	Telegram Bot Notification Came
2.	Mintbase testnet account connect	OK	Telegram Bot Notification Came
3.	Neatar testnet account connect	OK	Telegram Bot Notification Came
4.	Buy one NFT in mintbase and check in NEAR wallet testnet	OK	Telegram Bot Notification Came
5.	Create NEATAR and verify in NEAR WALLET	OK	Telegram Bot Notification Came
6.	In NFT lend, set listing to any one nft or neatar	OK	Telegram Bot Notification Came
7.	Set greater than 0 NEAR for Hour basis and Daily Basis	OK	
8.	Set Lesser than 0 NEAR (i.e -1 N) for hour/Daily basis	NOT OK	
9.	After one successful listing, verify in “My Listings” and “All Listings”	OK	Telegram Bot Notification Came
10.	After listed, check that listed NFT’s as “De-list” in those pages	OK	
11.	When Someone lend that, Rental expiry will on top of NFT icon and “delist” option disappeared	OK	
12.	We can also list other NFT of ourselves (Multiple NFT listing(lending) should support)	NOT OK	

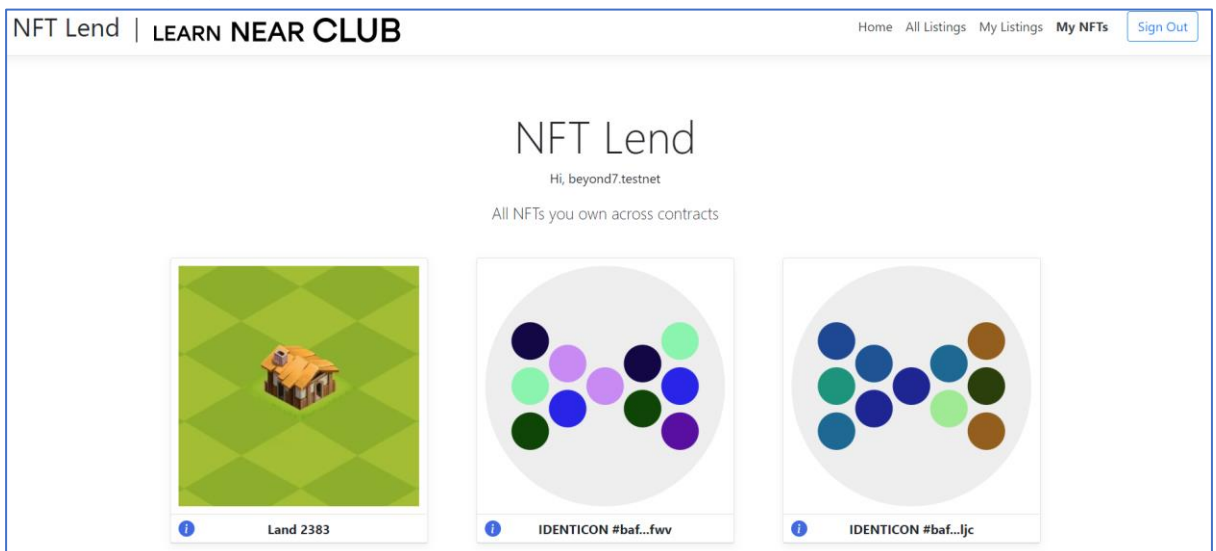

LNC BARREL TESTING

DESCRIPTION of TESTING in DETAIL:

1. Start on NFT LEND website

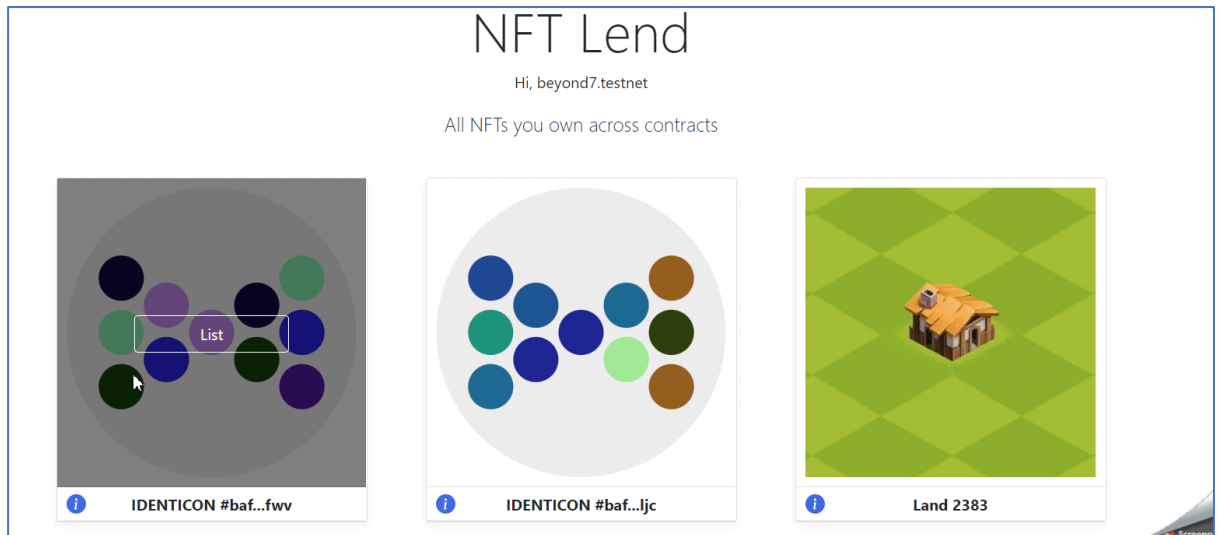

2. In my NFT page (After Connected) shows my collectibles here

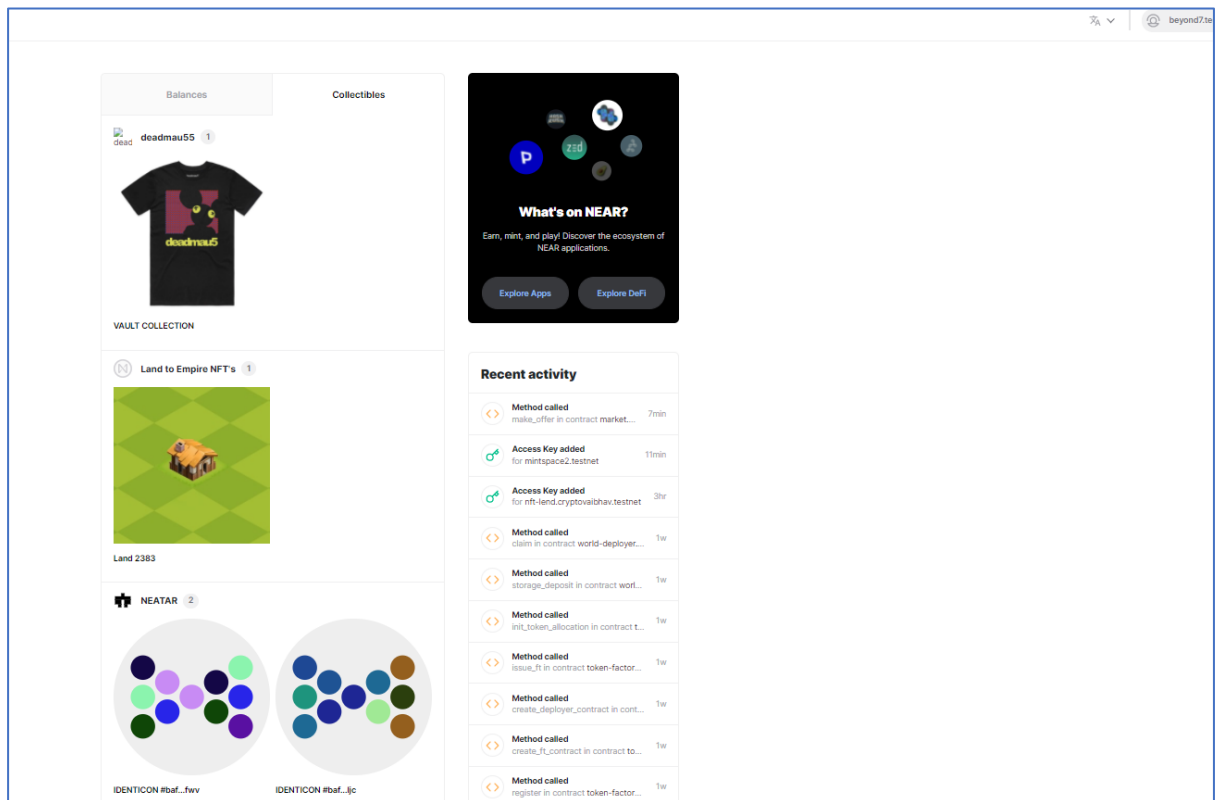

3. When hover the mouse to the NFTs, it shows as ready to lend (list)

LNC BARREL TESTING

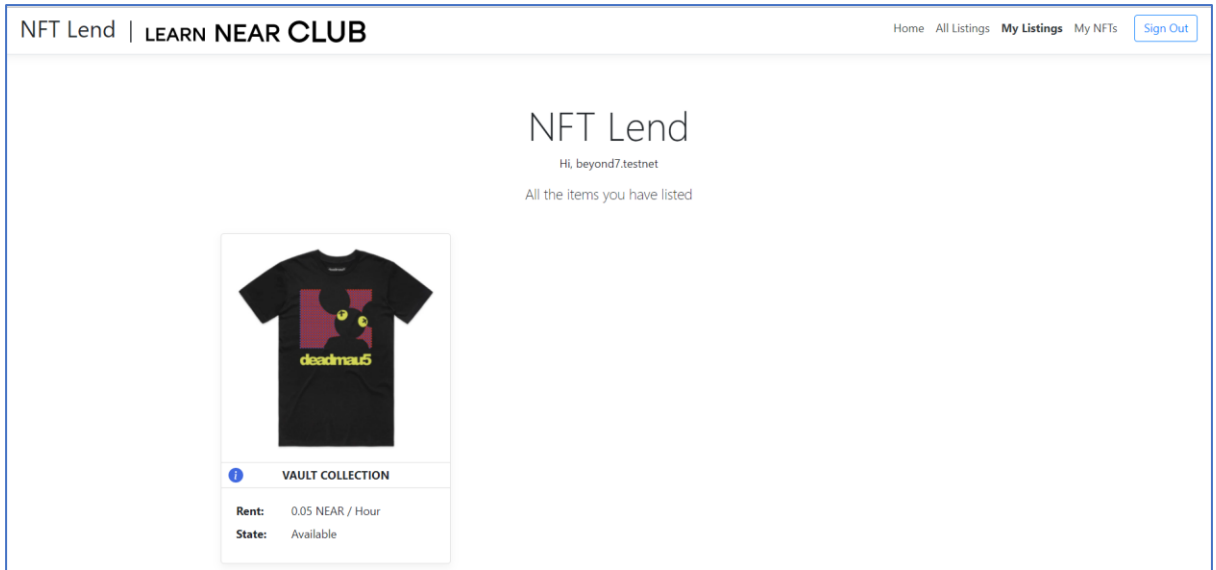

4. Buy one NFT on mintbase.io with near testnet

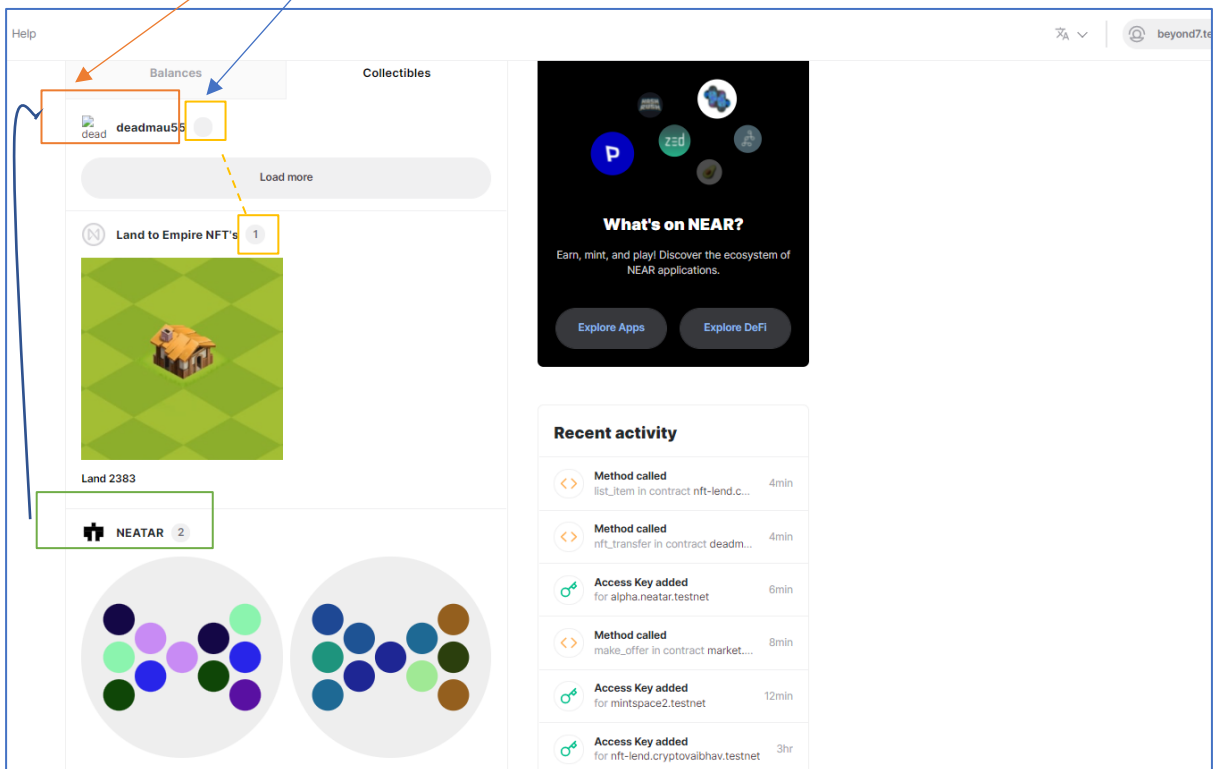

5. After, Lend it on NFT lend platform

LNC BARREL TESTING

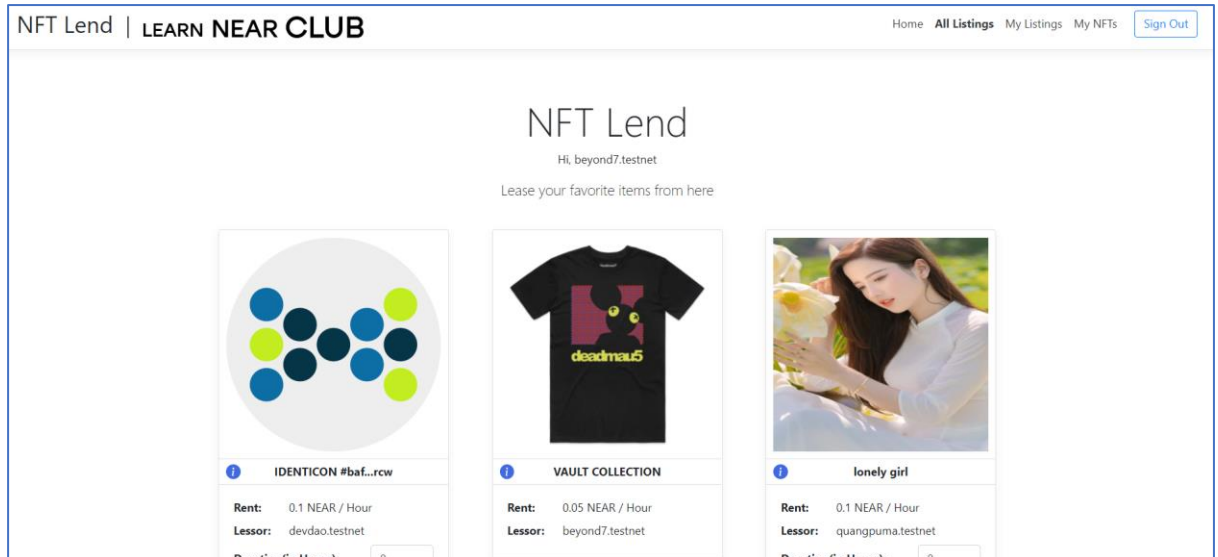

6. After that, In near wallet, **small issue** is that “the same nearar icon like is not showing for deadmau5 nft icon and also the current value is 0 but there it showing EMPTY” (PLEASE ZOOM IT)

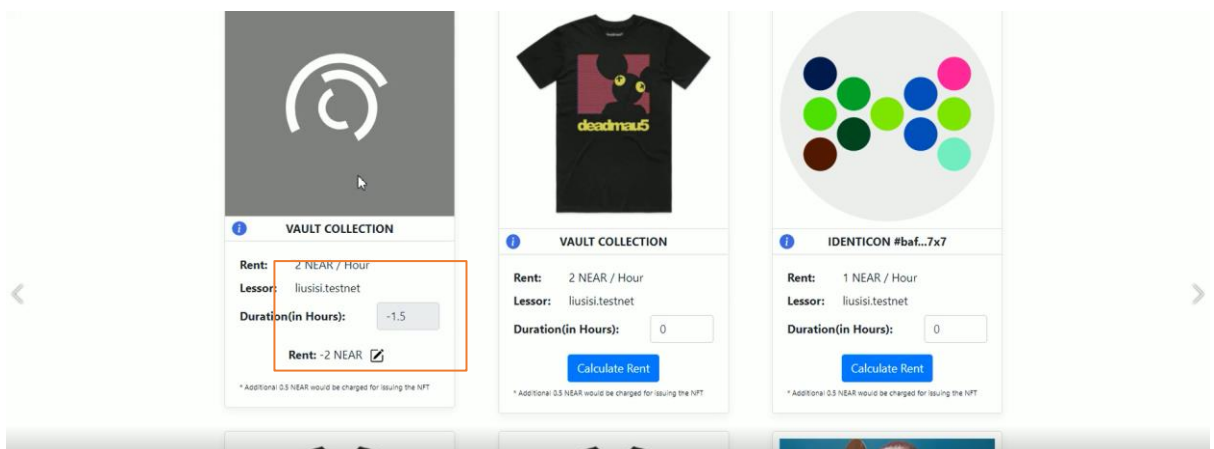

7. After that, it shows all listings

LNC BARREL TESTING

8. When we want to rent the other NFTs, **minimum 1 value should be entered and Negative value not accepted.** After that, 1.x decimal will be accepted but only whole number is accounted for the transaction. For example, 1.2, 1.3 ,1.9 capped to 1 hours only AND 0, 0.1, 0.9 are invalid since whole number is 0.

NEGATIVE ENTER

Additionally, Added One gif attached to this PDF for the test evidence that even 1.2 Hours capped to 1 Hour. Transacted at **12:20** And Rental expire shows at **1:20**

9. LIST ITEM TRANSACTION URL:

<https://explorer.testnet.near.org/transactions/DSiAsyrawEJo55ZErZnNFUAUWYWvQjNKdnaTAT9iXA4b>

LEASE ITEM TRANSACTION URL:

Published Twitter LINK:

https://twitter.com/Future_IsNear/status/1474629302012370944?s=20

10. When renting other NFTs, we can give hours/days up to 15 digits of value. After that, if we give 16 or greater digits, transaction will stick and will not proceed further.
[NEED some smooth traverse here]

11. All the rented NFTs expired in correct time

12. When give lease of one NFT , providing negative value on NEAR per hour/day . It allows to transact the value. **It is an Issue.** We need to filter this glitch.

LNC BARREL TESTING

List item for Lending

Once you list the item, it will be locked inside the contract

Name IDENTICON #baf...ljc

Description This is a dummy description

Contract alpha.neatar.testnet

Rent(in NEAR) /

13. Already one NFT on the list is in Lending now. We could not list another NFTs for lending. Why is that? Is it a rule like that?

NFT Lend | LEARN NEAR CLUB

Home All Listings My Listings My NFTs Sign Out

NFT Lend

Hi, beyond7.testnet

All the items you have listed

Expiry date: 12/26/2021, 8:46

VAULT COLLECTION

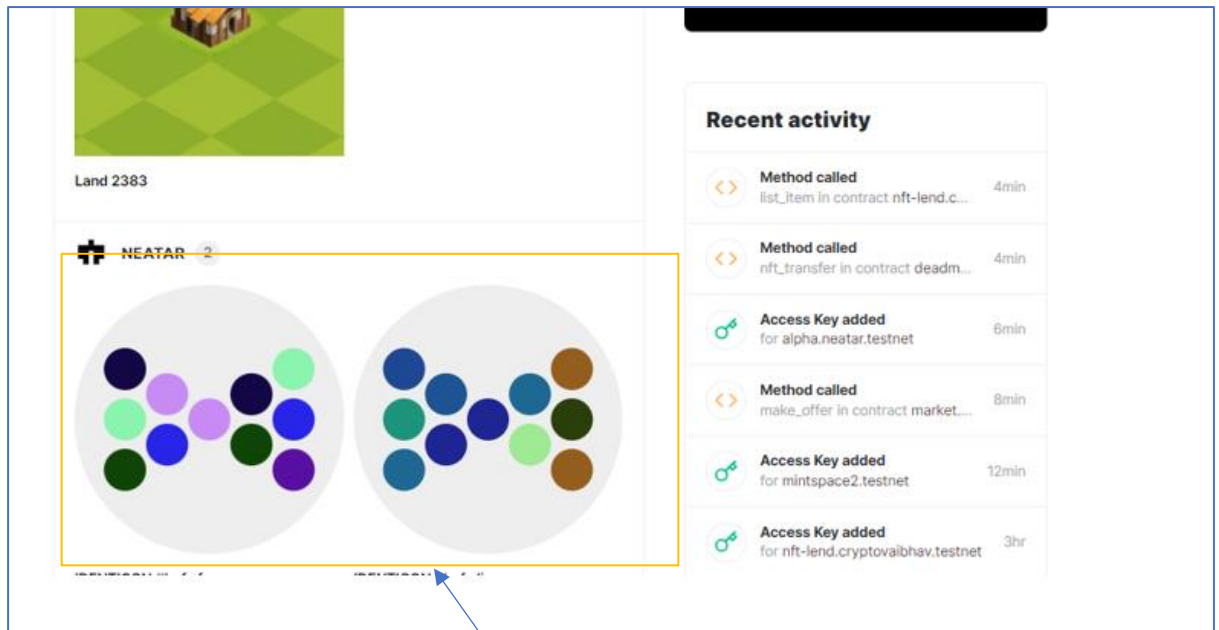

Rent: 0.05 NEAR / Hour

Lessee: holdingcrypto.testnet

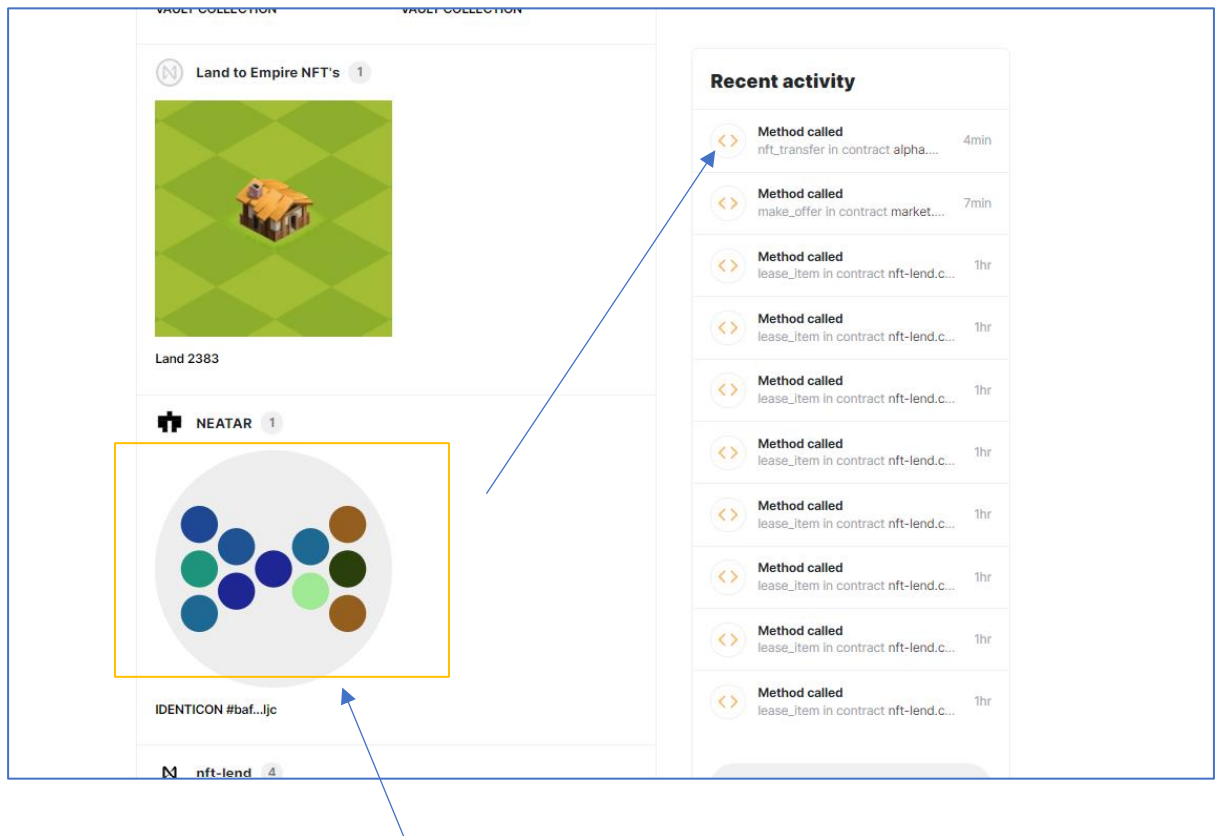

Only one NFT showing above (but I tried another NFT for listing)

But when try to transact for listing the NFTs. There seems to be nft transfer calling method is happened and Icon is disappearing from the NEAR wallet but list item call method is not proceeding

LNC BARREL TESTING

TWO NEATAR there above

ONLY ONE NEATAR there now

14. I have verified with Telegram Bot for the notification to come for each contracts when happening – **OK**

LNC BARREL TESTING

CONCLUSION:

This Lending platform is **supercool**. It helps to lease the NFT who like to use the asset who could not own it fully. As like real world finance and business, in a taxi business, rented car if connected with Internet, user needs/wish to track the assets anytime and should be handy. So more than showing Expiry date of rental asset, **giving the notifications in the associated account is good**. I came to know that issue of listing the NFTs which seems to be **BUG**. When sometimes, could not list NFT from Initial order itself. Else, Other testing details are covered in the above tables.

THANK YOU FOR THE OPPORTUNITY
